

## HNS 2022 LTD

### PURPOSE

Hinuera Stone is supplied for use as veneer cladding, paving, window & door sills, stair treads, fire surrounds and internal decorative linings.

### EXPLANATION

Hinuera stone is a naturally occurring volcanic rock (Ignimbrite), quarried at Hinuera in the Waikato. It is graded into four categories based on the strength, hardness, appearance which ultimately defines its end use. It falls within the range for heavy cladding materials (refer section 1 NZS 3604).

Other processing such as cutting, kiln firing (to create different tones or highlight naturally occurring markings) or creating different surface finishes (Sawnstone and Splitstone) have no effect on the physical properties of the stone.
